Singapore

December 1938

Underpaid overweight letter (Christmas card?) from Singapore, Straits Settlements, Malaya to Essex, England been partly paid by a copy of the 8 cents of 1938 postmarked 22 December 1938. The letter is marked "1oz" and "2/30" as double rate which was 16 cents leaving a deficit of 8 cents.

Also on the obverse is a Singapore "T" (Taxe) mark in a circle in which has additionally been written "34" indicating double the deficiency in gold centimes. There is a London "3d/ I.S./ A." postage due mark but no other British arrival mark or confirmation that the postage due was collected.

On the basis that the deficiency was 8 cents, double this was 16 cents. 16 divided by 8 (the Malayan surface rate) was 2 and this multiplied by the 1½d British surface rate gives 3d. 34 gold centimes could otherwise be converted at 1d=10 centimes rounded up to 3½d. This usual conversion factor (up to 1943) was dropped in favour of the former calculation basis.

On the basis that the deficiency was 3 cents, double this was 6 cents. 6 divided by 8 (the Malayan surface rate) was  $\frac{3}{4}$  and this multiplied by the  $1\frac{1}{2}$ d British surface rate gives 1.125d or 1d when rounded. 13 gold centimes could otherwise be converted at 1d=10 centimes rounded down to 1d also. This usual conversion factor (up to 1943) was dropped in favour of the former calculation basis.
